

WaterGlow Submersible Landscape Light 12V, Single Phase

LL1020 Submersible Landscape Light with Base and 20' Power Cord

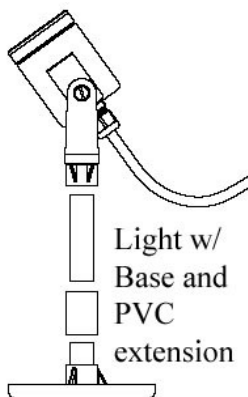

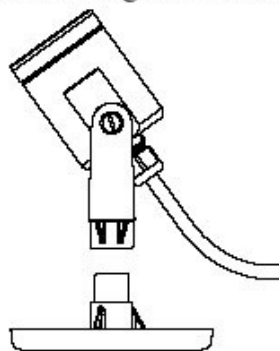

Operation

- ⇒ Light is installed in water feature and base is weighted for installation or removed and replaced with 1/2" PVC for in-ground installation.
- ⇒ Customer provided low voltage transformer takes in 120V and produces 12V power to illuminate the MR-16 halogen bulbs.
- ⇒ Light passes through the clear, tempered glass lens that can be positioned above or below the water surface to illuminate the feature.
- ⇒ The angle of the light can be adjusted and set using the brass set screws.
