

## Portable 12 Volt Aerator

Fast and safe aerator regardless of power availability. This powerful lightweight aerator uses 12 Volt DC power to provide efficient, high volume aeration for your tank, raceway, or pond.

### Problems Solved

- Remote harvesting/seining/sorting of fish
- Safe to enter pond with unit functioning
- Emergency backup for loss of power
- Easy to adapt to solar applications without an inverter
- Temporary aeration during aquatic herbicide applications
- Tank/pond mixing
- Off the grid aeration
- Could run off your truck battery

Model 1812AF035  
Comes with float  
and mooring ropes

- **Powerful:** 275 watt motor
- **Efficient:** 5 hours of run time off of a 100 amp deep cycle marine battery.
- **Rugged Motor:** Durable finish on all exposed material. Auto reset thermal overload protection. Stainless steel motor shaft sealed ball bearings. Long life brushes and mechanical seal. 22 operational amps.
- **Portable:** Light weight and easy for one person to carry and deploy.
- **Complete:** with 35' power cord with alligator clips, three 15 ft. mooring lines, on/off toggle switch, and external fuse protection. Needs only 15" of water to operate.
- 1 year warranty.
